The University of Kentucky is requesting the services of a consultant to provide design services for the Library Drive Extension from Funkhouser Drive to Huguelet Avenue located on the main campus of the University of Kentucky.

Phase One of the project will extend Library Drive to the East of the Funkhouser Building and run south until it intersects with Washington Avenue.

Phase Two will extend Library Drive from Washington Avenue to Huguelet Drive. This extension is necessary to alleviate all traffic on Rose Street and allow for safer pedestrian traffic through this area of campus. Chilled water will be replaced and upgraded under the Library extension, which will allow for extra capacity, better balance and flow, along with redundancy.

The design will consist of preparation of Schematic Design, Design Development (if required), and Construction Documents in accordance with University standards and procedures.

**Owner** University of Kentucky Capital Project Management Division - Room 222 Peterson (859) 257-5911 (859) 323-1017

<b>Document Status:</b>	Specs Only		

The University of Kentucky desires the services of an experienced and highly qualified firm to provide all final design and construction services via Turn-Key design and construction approach to restore an unnamed tributary to West Hickman Creek. This tributary is located on the southeast corner of UK's main campus, across from The Arboretum on the north side of Alumni Drive, southeast of the John Cropp Softball Stadium. This impaired stream is primarily spring-fed and drains 0.16 mi<sup>2</sup> (102 acres) including portions of Alumni Drive, The Arboretum, and UK's Athletics Complex. Maintenance of the area is difficult due to the wet, steep conditions.

The project includes construction of the stormwater control facilities at the specified site location for quality and quantity control, riparian buffer restoration. The purpose of this product is to improve water quality and reduce stormwater runoff by mitigation issues of standing water, erosion and water backing up current stormwater control mechanisms.

This project will provide stream restoration, improved maintenance conditions, and additional benefits through four elements:

1. A riparian buffer establishment;
2. An enhanced hyporheic zone;
3. A bioinfiltration swale, and
4. An outdoor classroom.

Additionally, the project design shall retain/otherwise accommodate the functional stream crossings for the UK Cross Country team practice course. Finally, the project design needs to incorporate all of the above items while creating an attractive and contextually appropriate contribution to this increasingly important gateway to the campus.

This project will require 440 ft. length of base paving 3.5". It will also consist of 1,180 length of surface paving 1.5".  
Base paving price should be based on installing the base asphalt on aggregate subgrade that is to be prepared by the Grant County Road Department in the 2 sections where the road has slipped and failed - full width. Once the base is installed in both areas, the surface will overlay the entire project end to end.

**Owner** Grant County Fiscal Court - County Courthouse, 101 North Main St. - Williamstown, KY (859) 823-7561 (859) 428-4567

This contract involves rehabilitating and improving safety along Montgomery Road from approximately 25 feet west of Cypress Way (near the City of Norwood corporation line) to approximately 310 feet east of Coleridge Avenue (near the Village of Silverton corporation line). The rehabilitation work of this contract includes the following: performing full-depth pavement repairs; planing the existing asphalt wearing course as necessary; placing a leveling pavement course or intermediate course of asphalt concrete; constructing curbs, curb ramps, concrete walk, and driveway aprons where necessary; performing inlet adjustments; adjusting and reconstructing utility castings to grade; resurfacing the entire pavement with asphaltic concrete; performing the necessary pavement marking work; upgrading trail signage as necessary; and replacing traffic signal loop detectors, where applicable. The safety improvement work of this contract includes realigning the Montgomery Road and Lester Road intersection; installing dedicated bike lanes on Montgomery Road; upgrading roadway signage; and upgrading traffic signals along Montgomery Road at all signalized intersections. The safety improvement work will also include upgrading pedestrian infrastructure at the Montgomery Road and Lester Road intersection as well as along Montgomery Road from Kennedy Avenue to McHugh Place.

# ATC Renovation Phase IV (SSC0100066)

# Bidding

940 Second Street - Portsmouth, OH 45662, Scioto

Status: Addendum information. Bids to the Owner on April 16, 2019 @ 10:00 a.m.  
NOTE: Notice of the project was received after the pre-bid meeting.

Completion Time: 74 consecutive days

Bonds:

Comments: All RFI need to be received by end of day on April 9th, (7 days before bid opening). All RFIs must be written (via email to BOTH bhosfeld@bhdpc.com and kdenman@bhdpc.com).

Prebid: April 2 @ 12:00 AM at Shawnee State University, ATC Building, Office of Planning Construction & Facilities, Room 165 Facilities Conference Room.

Plans: From the Printer for \$200.00, non-refundable.

Addenda: #1 dated 4/3, received 4/4.

General Trades: \$1,192,000;  
Plumbing: \$130,000;  
Fire Protection: \$22,625;  
HVAC: \$271,000;  
Electrical: \$174,700.

This project will include complete renovations in the North portion of the building. The work includes painting of walls and door frames, removing and reinstalling flooring, and replacing ceiling tiles and other ceiling mounted devices. The area is the renovated into the new layout shown. All new work will comply with the current building code and current ADAAG Guidelines.

The existing Atrium is separated by a 1-hour atrium separation wall and does not include a smoke control system. The renovation does not modify the atrium separation enclosure.

The renovation includes replacing HVAC diffusers and grilles, new lighting at a 1:1 replacement ratio to existing lighting, and relocation of sprinkler heads. VAV boxes will be replaced in many spaces as well.

The overall occupancy type of B- Business Use Group will remain unchanged. The overall occupancy count will also remain unchanged.

Plumbing work consists of replacing fixtures in restrooms 130, 132, 230, 232, 330, and 331. All restrooms that are new or are being renovated will be brought up to ADAAG Compliance. Refer to the toilet fixture count analysis adjacent to the description.

The scope of the current project includes replacement of the existing indoor generator at the Kentucky State University Chilled Water Plant. A new exterior pad mounted generator and fuel tank shall be installed with new automatic transfer switches and controls. Life Safety electrical power upgrades will be provided in the chilled water plant. Alternate scope will include removing the generator in the adjacent boiler plant and providing emergency power to the boiler plant from the new chilled water plant generator. Demolition, patching and repairing will be provided for the removal of the existing generator(s).

Add Alternate #1 - Remove Boiler Plant Generator and Transfer switch and provide new Emergency Power Connections to Boiler Plant from new Chilled Water Plant Generator.

**Addenda:** #1 dated 3/28, received 4/2

The project is a general demolition of an existing 700 plus square foot space previously utilized as a home economics type cooking space. The existing cabinets, ovens, dishwashers, garbage disposals are to be demolished and removed. All existing finishes including ceiling, flooring and walls are to be removed and replaced. The space is to be re-constructed with new casework into a demonstration type teaching kitchen. A new exhaust hood with fire suppression system is to be installed along with new MEP systems in the room as well as new exhaust equipment on the roof. Existing shafts are to be re-used for the exhaust system in the neighboring classroom. Work in the neighboring classroom will need to be completed around the scheduled classroom activities. All new kitchen equipment is to be provided and installed as part of this contract.

## Fire Department Vehicle Exhaust System

**Awarded**

998 Monmouth Street - Newport, KY 41071, Campbell

**Status:** Awarded. Bid March 4, 2019.

NOTE: The Owner did not keep a plan holders list for this project.

**Completion Time:** June 30, 2019

**Bonds:**

**Comments:** Any and all questions dealing with this proposal should be reduced to writing and faxed to Amy Able, City Clerk at (859) 292-3669 or emailed to aable@newportky.gov by no later than noon on Wednesday, February 27, 2019.

**Prebid:**

**Plans:** From the Owner online at <http://www.newportky.gov/City-Government/Procurement.aspx>

**Addenda:**

The exhaust shall be a source capture system designed to handle exhaust fumes from vehicles. The system shall address a total of seven (7) capture points housed in Headquarters Fire Station of the Newport Fire Department. Fans shall be large enough to provide a minimum of 650cfm per vehicle. System shall be designed to provide as much flexibility as possible. Tailpipe Adapters shall be of similar size throughout. Installation must be neat and clean using best material available. An expandable hose track or rail system shall be used to eliminate long hoses that have dips or loops.
